

Look at me now

It wasn't all that long ago When I was really small, I counted almost everything By using just a ball.

A bounce with every step I made Soon had me counting high, The distance, speed and time it took When I threw it to the sky.

People thought I was quite mad When I used it for subtraction, But bashing it against the wall It broke, and taught me fraction.

Algebra and times tables To me, they all were great, Volume, mass and area Were easy to calculate.

So as I grew, I studied hard Including numismatics, It's really nice to meet you all Hi, I'm Mollie Mathematics.
