Memory Game

Skills practised

You will challenge your *working memory*. This skill allows us to hold information in our minds and to mentally work with it. We use it for tasks like remembering steps in a plan, connecting two ideas or combining words into whole sentences while we read.

Try this

- Spread your six bricks out in front of you
- Study the picture on this card for 3 seconds, then put it away
- Build the model from memory
- Can you do this activity in teams?

Six Bricks

Six Bricks is one of the LEGO Foundation's tools to introduce learning through play into different settings. Through fun, short and playful activities with sets of LEGO® DUPLO® bricks in six bright colours, children practice a range of skills.

Back to Back

Skills practised

You will challenge your *perspective-taking* and *spatial awareness*. Our ability to picture in our minds what others see, and to communicate so other people understand what we see, means we can exchange experiences.

Try this

- Work in teams of two and sit or stand back to back
- Use your six bricks to build a model out of sight of anyone else
- Instruct your partner how to build this model
- Without looking at your model, your partner has to follow your instructions to replicate what you built

Brick Sequence

Skills practised

You will challenge your *sensory-motor skills*, using your eyes and hands to coordinate movements. Physically, this helps us to balance, walk and run, but also refreshes our energy and thinking while we enjoy being active.

Try this

- Lay out your bricks in a row – some facing up, others down (see picture)
- Give each position (up and down) a sound, stomp or clap – and ‘translate’ your visual pattern into movement and sounds
- Can you spice up the sequence with other brick positions?

Six Bricks

Tricky Tower

Skills practised

You will challenge your *fine motor skills*, and especially the muscles used for “pinching” pencils in a steady grip. We use fine motor skills every day for tasks like handwriting, typing, crafts and playing instruments.

Try this

- Spread out your six bricks on a table
- Stack the bricks short end to short end, using one hand
- Try to make the tower as high as possible
- Can you do this with your other hand?

Creative Creatures

Skills practised

You will challenge your *symbolic representation*.

This ability allows us to create associations, like representing an arm with a brick. Using symbols and representations helps us to make ideas real and meaningful to others.

Try this

- Build a creature that moves
- Add wings, legs, heads, arms – anything!
- Find a partner and explain how your creature moves
- What else can you build?

Hanging Around

Skills practised

You will challenge your *problem solving* and *self control*.

These skills help us to think through a challenge, to stay focused as we weigh our options and try out ideas, and to persist when we encounter obstacles and need to improve what we do.

Try this

- Take a brick, and place it close to the edge of a table
- The challenge is to hang as many bricks off the edge as possible
- You need to counterbalance as you build
- Work in teams and see how far you can go with 12 or 18 bricks
