

FIRST® LEGO® League Discover – at home!

We've created a new registration option for parents to run *FIRST* LEGO League Discover at home with their children while schools are closed. Designed for 4-6 year olds, it will engage your youngest children and keep them learning at home, all the while having loads of fun together! DISCOVER HOME gives you enough kit for up to four children, costs just £13 plus VAT and includes:

- An exclusive Discover model (DUPLO obstacle course), five sets of Six Bricks, DUPLO characters and a building mat
- Engineering Notebooks – to design, doodle, annotate and improve ideas
- Digital IET Certificates – to print out at the end of the programme and celebrate the achievements of your children
- Team Meeting Guide – this easy-to-follow guide has the 10 sessions you can work through to give your children's exploring and learning context and direction

In addition to the physical resources, you will also have access to free online resources, including:

- A 'How To' guide for running the programme in your own home
- Getting started videos
- Session videos
- Six Bricks activity videos to join along with
- Images to use to support learning
- More Six Bricks activities
- Curriculum link and progression of skills document – to see just how relevant and important the programme is for your children's learning!
- Links to other great resources

You'll need to have extra DUPLO or LEGO pieces to use for the children's inventive builds, which you most likely have by the bucket load already at home! If you want to get some more to use, we really love the LEGO STEAM park DUPLO set which can be bought from any major retailer, or www.raisingrobots.com, as there are absolutely LOADS of wonderful bricks that allow your children to get as creative as possible.

Get stuck in with the fun learning and register for your at-home version of Discover [here!](#)
