**Activity title**

**Naval Flags** – talking to someone that is too far away to hear us

**Time required**

30 minutes – 1 hour

**Activity summary**

Making and using naval signal flags.

**By the end of this activity, you will be able to:**

Use naval signal flags to state your name.

**What’s this all about?**

Imagine you are on a ship. You need to send a message to another ship. They can see you, but not hear you, even if you shout. There is no mobile signal, as you are in the middle of the sea. How do you send the message?

One way is to use naval signal flags. Each flag means a different letter. A string of flags can spell out the message.

Here is the alphabet using naval signal flags:
Activity title: Naval flags

Using naval signal flags
Here is a word using naval signal flags:

Flag messages are read from the top to the bottom. This is because the messages are normally hung from the ships mast.

This message reads SHIP.

What equipment will you need?
- Paper
- Scissors
- Ruler
- Pencil for outlines
- Coloured pencils or felt tips
  Optional: String and sticky tape

Now try this

State your name using naval signal flags

a) Carefully cut out the flag template with scissors.
b) Count the letters in your name. Draw round the flag template on paper, for as many flags as you need.
c) Carefully cut out the flags with scissors.
d) Use pencil and a ruler to draw the lines on your chosen flags.
e) Add the colours needed to your flags.

You could use sticky tape to attach your flags to a piece of string, so you can hang them up.
