

Summer Scavenger Hunt

Calling all young adventurers! Let's discover the natural world whilst you're out on a walk or just exploring around your local area (whether it be a field, woods, along country footpaths or a dog walk!). Why not chat as you explore and see if you can solve our questions below... (We've provided answer sheets online for you to download too.) Ready? Let's go! Who will find everything first?

A feather

Which bird has the most feathers and why?

- Robin
- Penguin
- Swan

Some dandelion seeds

Which type of weather helps dandelion seeds to spread?

Three different species of bird

What are the similarities and differences between the birds you have found?

An insect

How many insects can a ladybird eat in its lifetime?

- 50
- 750
- 5,000
